

## Standard Mesh Liquid Filter Bags Monofilament & Multifilament

- Micron ratings from 1 to 1500
- All industry standard and custom sizes available
- High flow/low pressure drop media
- Surface-retention filtration
- Wide chemical compatibility
- Sewn construction
- Handles standard on all bags
- Choice of steel ring or plastic flange
- Economical removal of non-deformable contaminants
- Non-fiber releasing
- Good removal efficiencies
- Temperature ratings to 350°F
- Polyester and nylon materials meet FDA regulations for contact under CFR21, section 177.1520
- Silicone-free construction

### Mesh Bag Materials

**Multifilament Mesh** media is woven from threads made of smaller fibers. Bags made from this material are low cost and disposable.

**Monofilament Mesh** is woven from single-fiber threads. The openings are square and uniform. Bags made from this material have excellent strength.

### Mesh Bag Styles

Steel-ring bags have a galvanized steel ring (stainless steel optional) sewn into the top of the bag. They are supplied with sewn seams standard.

Plastic flange bags have a specially-designed flange sewn to the top of the bag. They are supplied with sewn seams standard (welded collars available upon request).
